

Technical Specification Details 1 Introduction Legal and Safety Requirements for the Owner Occupier Legal Requirements Safety Instructions 2 General Description Control System Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection Landing Cut Out Switch (In Motor Room	5 6 7 7
Legal and Safety Requirements for the Owner Occupier Legal Requirements Safety Instructions 2 General Description Control System Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	7 7
Legal Requirements Safety Instructions 2 General Description Control System Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	8
2 General Description Control System Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	8
2 General Description Control System Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	8
Control System Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	
Drive Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	
Car and landing Doors Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	9
Typical Machine Enclosure Layout 3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	-
3 Control System Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	9
Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	10
Car Preference control Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	
Door Open Button Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	11
Door Open/close Trip Timer Advanced Door Opening Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	11
Call Acceptance Indicator Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	11
Doors Parked Closed Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	11
Door Anti-Interference Feature Re-Levelling (Anti-Creep) Stuck Button Detection	11
Re-Levelling (Anti-Creep) Stuck Button Detection	11 11
Stuck Button Detection	12
	12
	12
Car Door Safety Edge	11
Emergency Carl Lighting	12
Alarm Button	11
Self Checking	11
Homing to Pr-Determined Floor	13
Door Close Button (quick close of door)	13 13
Lift Overload (Single Set Point)	
4 Emergency Release Procedures	
Emergency release procedure	14
Procedure before operating manual lowering valve	14
To move the car	14
Passenger release	15
After passenger release Guidance leaflet	15 16
