

TB-GEN002

TECHNICAL BULLETIN

INFORMATION ONLY

For the Attention of : All subcontract Installers, Testers, Site Supervisors,
Margaret Pitman, Jon Blight, Paul Clifton, Graham Mears

From: Peter Amura – Passenger Installation Manager

Date : 16th May 2014

Subject : **Pendant Controls**

Product: **All**

Pages : 1

It is our intention to totally phase out use of pendant controls once OEM installation method has been completely adopted for installation of OEM product range. This is our goal for the end of 2014.

You will operate the lift during the installation phase via the OEM's fixed controls only:

- Car top
- Control cabinet

In view of this directive and approach to installation Stannah will no longer be issuing pendant controllers for fitting of our OEM products. Current issue of pendant controls can be utilised by Stannah sub contractors up until time they are no longer fit for use.

All issued pendant controls remain property of Stannah and must not be used for installation of any units outside of the Stannah range.

This bulletin covers but is not limited to the following range:

- Stannah Maxi Traction
- Stannah Maxi Hydraulic
- MP VS controller
- MP Go controller
- Kleemann - Serial Controller
- Kleemann - Lisa Controller
- Kleemann - Maison Plus
- GLE range

If you have any questions concerning this Bulletin please speak with **Peter Amura on 07767 119086**
