

TECHNICAL BULLETIN**INFORMATION ONLY**

For the Attention of : Installers, Trade Customers, Training Dept

Date : 17th December 2009

Product : SL Midilift (new structure)

Subject : Door frame cover plate fixing

Pages : 1

Originator : Stannah Lifts Ltd, Anton Mill, Andover, Hants SP10 2NX 01264 339090

Detail

Following concerns over the use of countersunk fixings to secure the cover plates to the door frame, self drill dome head screws are now to be used (this also includes the adjacent entry side infill panels). These fixings can be found in the door frame fixing kit.

Cover plates will be taped to the cross member by assembly and should be removed before installation.
