**Originator :** Stannah Lifts Ltd, Anton Mill, Andover, Hants SP10 2NX 01264 339090

---

### Detail

Stannah Lifts have developed a lifting aid which is in the form of mechanical jacks to aid the lifting and manoeuvring of the SX product, as it is installed or uninstalled onto the rail.

The lifting aids are in the form of 2 mechanical jacks modified with additional brake castors and attachments that line up with new mounting holes now added to the SX product.

Once attached, the lift can be manoeuvred into position on the castors or raised up and down on the jacks.

Castors

## **Summary**

The sets of jacks are available to order from our spares dept. Please quote part number 4000485-1 and 4000485-2. Price on application.

The installation guideline to use the lifting aids can be found on the technical website. Please note that if they are to be used on units manufactured earlier than January 2011, additional fixing points will need to be drilled onto the carriage chassis to mount the jacks.
