

TB-MP002

TECHNICAL BULLETIN

INFORMATION ONLY

For the Attention of : Branch Managers, Phil Beresford, Darren Cooper, Kieron McCormick, Margaret Pitman and Testers

From: Peter Amura – Installations Manager, Stannah Lifts Ltd

Date : 20 February 2014

Product : MP– MPGo model – MRL Traction

Subject : VS Controller used for Fire Fighting models

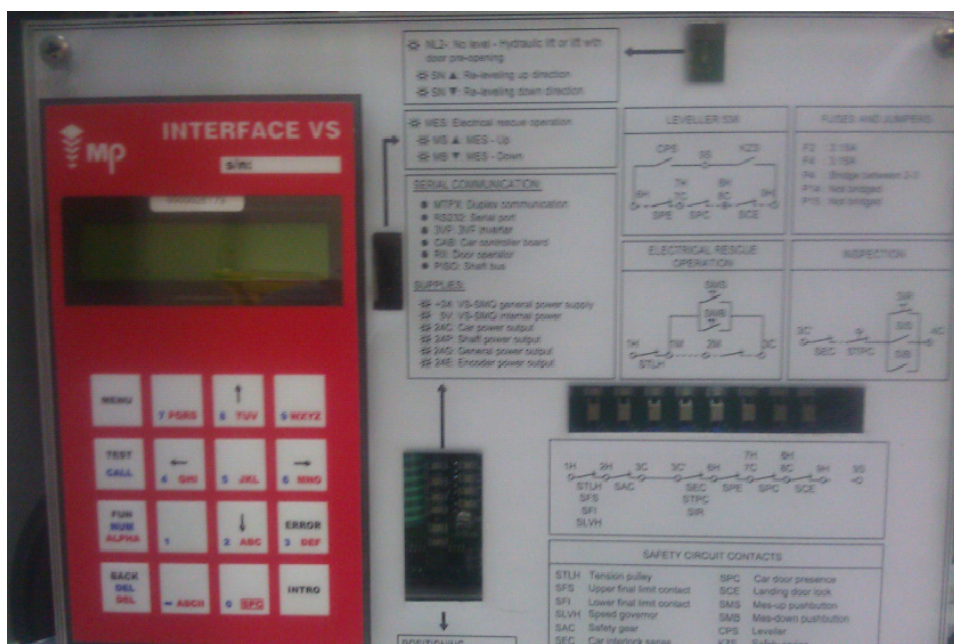

Pages : 2 plus 2 attachments

Background

MP Lifts S.a (Spain) have advised Stannah that they will now integrate within their VS Controller (high end option) their diagnostic tool making it open protocol (see picture below). MP did want to charge us for a separate diagnostic tool, but pressure from Kieron McCormick and Peter Amura made them change this approach.

This should not impact any Branch as MP are sending replacement boards to Stannah Lifts and our Testers we fit the new boards.

Important Note: The Board and the Console are a matched pair; you can not swap the integrated consoles between different boards.

Action

No action for Stannah Service Branches apart from sharing this information with your Engineers

Stannah Lifts Testers will replace the existing boards with new ones.

Below is the list of jobs sold with the VS controller.

JobNo	SiteCompany	Branch
330005	Barking Riverside	Dartford
