## TECHNICAL BULLETIN

### **MAINTENANCE ISSUE**

**For the Attention of :** Service Engineers, Installers, Trade Customers, Testers,  
Training Dept, H & S Manager etc.....

**Date :** 13/2/12

**Product :** Stannah Maxilift Traction

**Subject :** Additional suppression required on contactor

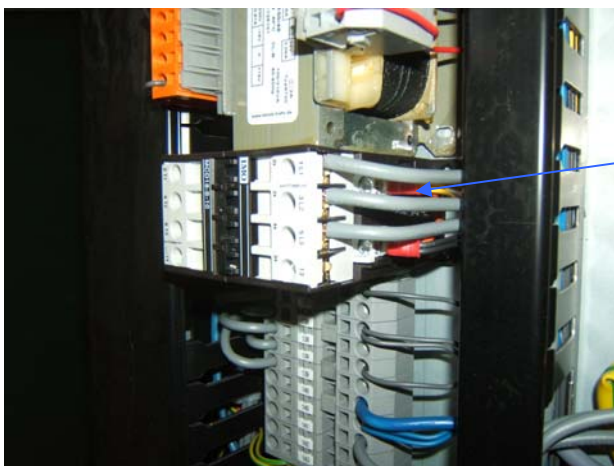

**Pages :** 1 of 1

**Originator :** Stannah Lifts Ltd, Anton Mill, Andover, Hants SP10 2NX 01264 339090

### Detail

Recent reliability data has identified the need for additional protection to be added to all BREEAM Traction control panels. This additional circuitry will better protect the Nexus and prevent recent hardware failures experienced.

A surge suppressor is to be fitted to the coil terminals A1 and A2 of the BREEAM contactor C5 on the landing control panel. The part is available FOC from our spares dept by quoting part number **9333795**. We are recommending that it is fitted to all Stannah traction lifts in service that were manufactured after the 20<sup>th</sup> September 2010

Suppressor is fitted on  
the coil terminals A1  
and A2

Please contact the product development department on 01264 339090 if you have any further questions.
