TECHNICAL BULLETIN

INFORMATION ONLY

For the Attention of : Service Engineers, Installers, Trade Customers, Training Dept

Date : 01/02/2018

Product : Midilift Piccolo

Subject : Additional cabin sizes added to product scope

Pages : 1 of 1

Originator : Stannah Lifts Ltd, Anton Mill, Andover, Hants SP10 2NX 01264 339090

Summary

In order to satisfy more of the Midilift market, we have extended the range of the Piccolo product (Machinery Directive cabin lift with rated speed 0.15m/s) to include two additional smaller cabin size options. The first of these smaller cabin models is scheduled for installation in Feb-Mar 2018.

Detail

The fundamental cabin construction and product design remains unchanged. The cabin sizes now offered on the Piccolo are:

| Cabin Width (mm) | Cabin Depth (mm) | Clear Opening (mm) | Comments |
|------------------|------------------|--------------------|---|
| 1100 | 1400 | 900 | Part M (England & Wales) & section 4.2 of the Technical Handbook (Scotland) compliant |
| 950 | 1400 | 800 | Part M (England & Wales) compliant |
| 950 | 1250 | 800 | |

The rated load is 400kg (5 persons) for all three cabins.

All three cabins are available as wall mounted or FX structure, up to a maximum travel of 12m.

General improvements introduced:

- horizontal stiffeners included behind dado panels on all walls as standard (to provide more rigid construction)
- door operator mounting method changed to permit common method for all cabin sizes
- changes to tolerances and corrections to minor misalignment issues to ensure sling and cabin components fit together more easily
- idler pulleys on encoder will be factory lubricated to reduce noise during lift operation
- clip on wallboards on COP wall now slide sideways in to position for easier installation/removal

All Piccolo documentation has been updated to include the relevant changes.
