

TECHNICAL BULLETIN

For the Attention of : Installers, Lifts Services, Trade Customers

Date : 30/11/07

Product : System 21 Passenger Lifts

Subject : Handrail spigots "nuppsy" changed in design

Status : Product update - information only

Pages : 1 of 1

Originator : Stannah Lifts Ltd, Anton Mill, Andover, Hants SP10 2NX 01264 339090

Our handrail supplier, Schmidt Edelstahl has changed its specification of its handrail spigot - "nuppsy" (these are the parts that screw into the wall panels, see the photo below). The design of the "nuppsy" has changed from a one piece design to a 2 piece design.

Functionally there are no issues with the design, as the two parts lock together when tightened up against a wall. However during installation 2 tools will have to be used rather than one (an Allen/hex key for the threaded part and a pair of pliers or mole grips for the main body).

New 2 piece "nuppsy" in foreground, short and long single piece "nuppsys" behind.
