LIFT TYPE:- System 21 Lifts - Tip-Up Seats.

To: Stannah Services
Trade Customers.

System 21 lifts equipped with a tip-up seat on the car side wall.

Description

We have recently experienced a problem with a tip-up seat fitted to a lift car side wall. The screw fixings had pulled away from the side wall. After extensive testing, it is felt that this failure was an isolated incident, however the following recommendations are suggested.

Action

All System 21 lifts with a tip-up seat should be inspected at the next scheduled service visit to ensure the fixings are providing a secure attachment. If any fixings are found to be insecure, remedial action should be taken.

All tip-up seats should have a label affixed to the seat body informing the user of the maximum load for the seat.

Labels will be despatched to relevant service branches and trade customers in the near future.
